WE KNOW THE CHALLENGES:

AGED INVENTORY

Between 25% and 50% of customer packaging inventory is obsolete or slow moving.

VIMS can significantly reduce the dollars you have tied up in your packaging inventory.

LIMITED RESOURCES

Fresh produce growers and shippers, like most businesses, have limited resources and must decide what is the most valuable use of their time.

VIMS reduces the amount of time you spend on inventory management, purchasing and other supply chain activities.

911 EMERGENCIES

Packaging shortages or disruptions in your supply can impact production and cost money.

VIMS can drastically cut down on packaging supply shortages and reduce production downtime.
