

STRAPPING

Volm provides a highly engineered polyester strapping material that combines the performance properties of both steel and plastic when strapping to hold products on pallets or in bundles. It can reduce indentation on unprotected package corners and, unlike steel strapping, does not rust and stain products when exposed to the elements. It's also safer to handle than steel strapping and will not damage forklift tires.

When strapping is applied to a product, it can be applied by hand using strapping tensioners and sealer tools. Battery power operated hand-held devices are also widely used in bundling or palletizing.

FEATURES

- Regular or High Strength strapping available
- Seals and buckles
- Thickness variances
- Various width measurements
- Multiple colors available
- Completely recyclable

PRODUCT SIZE RANGE

- Coils will range in poundage from 19 to 30 lbs*
- Length of coils from 5,600 ft to 11,400 ft**

MOST COMMON USES

- Agricultural packaging
- Industrial packaging
- Banner manufacturing
- Warehousing / logistics

* Strapping is priced per pound

** Length of coils will vary based on the width, thickness, and break strength chosen
