

## THERMAL / DIRECT THERMAL LABELS

Volm provides blank, direct thermal and thermal printed labels. Users can create archival-quality labels to withstand temperature extremes, ultraviolet exposure, chemicals, sterilization, and more.

---

### FEATURES

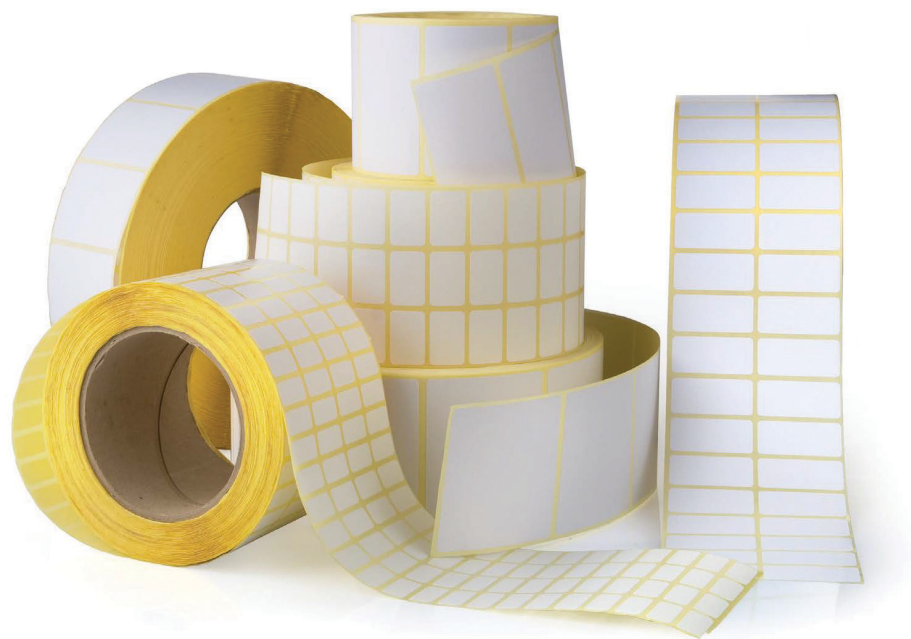

- Long-lasting images on a wide variety of materials
- Multiple color layouts and formations
- 200 to 300 elements per inch are heated selectively to produce an image across the label
- Can be used with automated Label Printer Applicator
- Desktop produced labels can be hand applied or rewound into rolls for automatic application

### LABEL SIZE RANGE

- Range from 3"x 2" to 8.5" x 11"
- Length of labels depend on quantity per roll\*

### MOST COMMON USES

- Plastic mesh bags
- Polyester bags

---

\* Length of label roll will be based on the number of labels in each roll and the weight dimension of each roll
