Ultratech™
Eco-Smart Packaging Technology

Greener Lighter Smarter

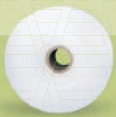

Designed and perfected to specifically deliver superior strength and stability for sustainable produce packaging, Ultratech™ mesh uses up to 30 percent less material and balances the need for greener, lighter and smarter qualities to deliver significant advantages at every step of your operation.

UltratechTM Eco-Smart Packaging Technology

UltratechTM A Side by Side Standout

ULTRATECH

TRADITIONAL MESH

vs

The whole 3450 yards is significantly smaller, using **30% less plastic** than CLAF.

Both of these rolls contain 3450 lineal feet of mesh. The UltratechTM roll is significantly smaller, indicating just how much raw material it saves.

ULTRATECH

TRADITIONAL MESH

56,000 bags

vs

56,000 bags

20% more bags—less weight and waste.

Ultratech uses less material for more efficient shipping and storage. Less weight saves money in shipment; more bags per box means less waste and lower disposal costs.

Made in the USA

Ultratech mesh is manufactured in the United States by an American family-owned and operated company, providing many distinct advantages including proven availability and superior customer service.

Backed by Volm

Any cutting edge technology is only as good as the company behind it. Ultratech's revolutionary packaging technology comes from Volm, the produce industry's leading innovator and packaging supplier for over 60 years. www.volmcompanies.com

UltratechTM

Ultratech – Created for today's challenges

- Uses less fossil fuel for shipping
- Smaller carbon footprint than traditional mesh bags
- Less space is required / more bags per truck / fewer trucks needed
- Supports corporate "green" initiatives
- USDA Food Grade Certified

Ultratech – Engineered to enhance package integrity

- Increased seal strength
- Minimizes bag failure
- Engineered for superior bonding

Ultratech – Flat by design

- Flat strands increase bonding surface area for superior seal
- Flat strands improve inner layer bond strength improving overall mesh strength

Ultratech – Gentle on products

- Non-round mesh strands spread pressure more evenly across produce surface
- "Soft" mesh qualities reduce surface cutting and abrasion on produce

Ultratech – Superior shelf presence

- Available in multiple colors and color combinations
- Can be made in exclusive, brand-enhancing custom colors

Ultratech – Improved VFFS machinability

- Reduces waste at every step of the process
- Compatible with all existing industry-standard equipment
- Available in pre-made bags and high-capacity rolls
- The light-weight, low-profile mesh enables high production speeds

Ultratech – Developed specifically for fresh produce

- Perfectly suited for a variety of hard and soft produce
- Available in many configurations, sizes and closure styles
