

M2 XXL

The M2 XXL weigher is a great system for packaging lines between 10 and 50 pounds. This multi-lane weigher allows for accurate weights and fast production speeds while keeping costs down. The three vibrating lanes dedicated to each bucket are capable of moving a large volume of product into the buckets. The final weight is handled by a one lane discharge that can send to two sides of the weigher.

FEATURES

- Low cost, high speed system
- Two large weighing buckets with capacities up to 50 pounds
- Both weighing buckets equipped with three vibrating lanes
- Touchscreen operation
