

VST 25 PALLETIZER

This palletizer is designed to offer a high level of stacking performance with minimal expenses.

It can reach a capacity of 22 bags per minute. The manipulator positions your product with the utmost accuracy on the formation slides, allowing for the overlapping of bags.

The formation slides are an indispensable feature to ensure a high capacity as well as great stability.

The user friendly controls are very intuitive. The free-programmable controls offer a setup that meets all of your requirements.
