

THE BEST FROM EVERY HARVEST

Hoppers

# Wet Hopper

Gently receives 'quick-tip' produce. Provides pre-soak, dirt collection and buffer storage.

Potatoes • Carrots • Parsnips • Swedes • Turnips • Beetroot • Celeriac and more

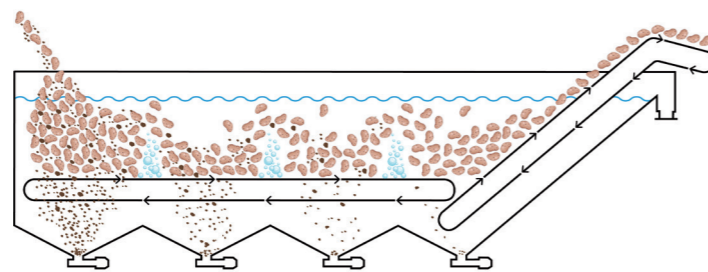

Our Wet Hopper allows produce to be quickly tipped into a water filled tank without fear of damage.

Incoming produce can be dirty, clean or semi-clean.

Produce gently travels along on a web conveyor toward an out-feed elevator. As it travels, fine sand and dirt fall through the web belt into collection hoppers in the base. Purge valves regularly clear debris build-up.

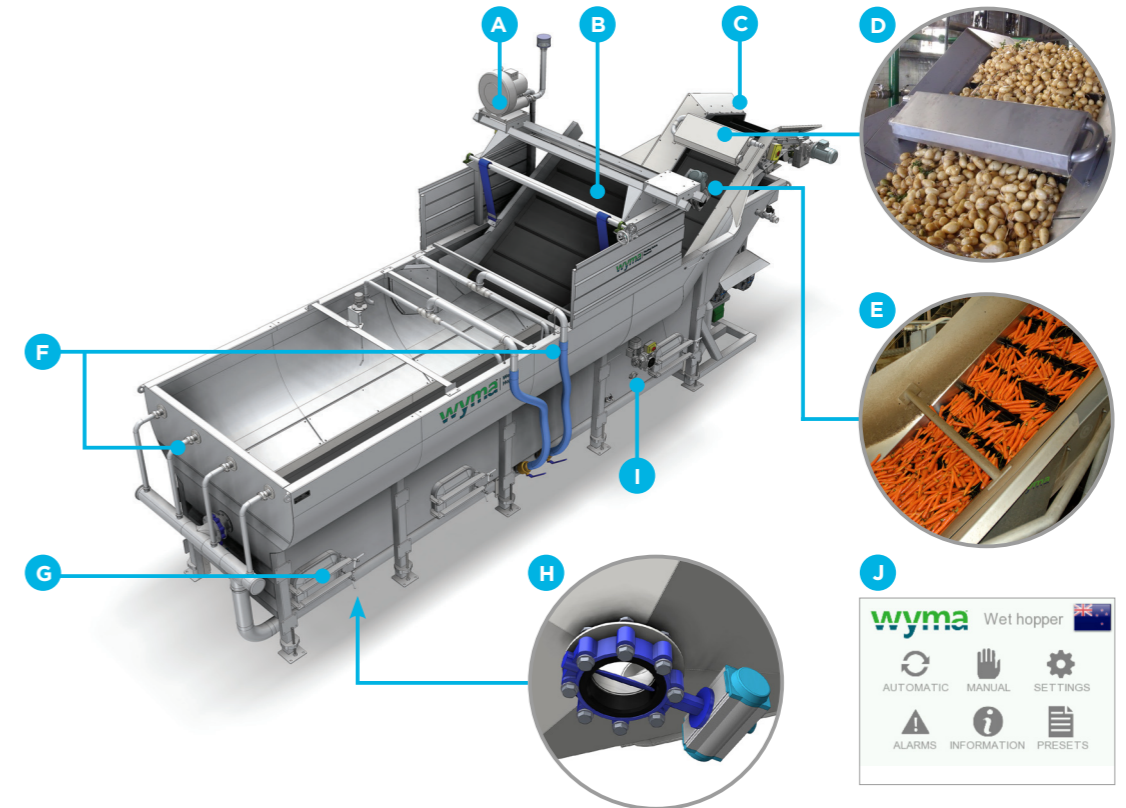

An air agitation system can be fitted so produce rubs gently against other produce, helping remove dirt.

An out-feed elevator lifts produce out of the water and delivers it to the next stage in your line. Spray bars can be fitted for a final rinse.

Air Agitation Produce Sand & Dirt

# Features and benefits

- A Air agitation
- B Floating Debris Remover\*
- C Variable speed controlled Elevator
- D Water spray bar\*
- E Rubber web belt - double bar cleats

F Rear and mid jets\*

G Access hatches

H Automatic dump valves\*

I Pressure sensor

J Equipment automation with touchscreen electrical controls

Internal cleaning bars

Stainless steel construction

Minimal gaps around plastic wear strips

Mounting plates for platforming

- Gently agitates produce to soften and remove mud
- Prevents floating debris from clogging downstream equipment
- Adjustable depth in water, to suit different debris types
- Controls line throughput. Gooseneck out-feed for gentle delivery to next stage
- Rinses produce before next stage in your line
- Gently handles produce and lets water through. Robust cleats
- Used for 'Fast Empty' option
- Pushes floating debris to Floating Debris Remover and produce to Elevator
- Nozzle flaps prevent produce entering the jets
- Full access on both sides for maintenance and cleaning
- Full visibility of hopper floor
- Controlled, periodic removal of sand and dirt
- Manages water level and protects pump
- Smart and easy equipment control
- Rinses dirt from tank as water drains out
- Durable and hard-wearing, designed for strength and cleanability with minimal horizontal surfaces.
- Prevents small produce from getting caught.
- Makes it easy to install platforming for equipment viewing and access.

\* Optional
