

# The Volm Engineered Solutions Team

The smartest way from field to market—to profit.

# With the Volm VEST team, iteration beats incremental. Here's why.

Typical packing facility design or new equipment integration takes an incremental approach that takes stock of what you've already got and what you need, and then works to reconcile the two. The Volm Engineered Solutions Team (VEST) takes a more effective Iterative Refinement Design approach that enables a smarter, more cost-effective design and implementation process.

## The many benefits of Volm VEST solutions

- Reduce labor costs through automation
- Improve operator safety
- Increase throughput and productivity
- Enhance fresh produce traceability and consumer safety
- Lower rejection rates through gentle food handling and accurate weighing
- Streamline operation and production processes

## Let us help you build your next success—with Volm VEST.

What can the Volm VEST team do to ensure the best return on your next major capital investment? Let us show you with a no obligation Project Request evaluation. Call 888.349.8656 for details.

### Project Request Evaluation

This first step gets the whole thing started by gathering all necessary information to determine whether the Volm VEST team is the best solution for your specific challenges.

### Flash Assessment

- Identify key drivers/ goals of the project
- Determine the project's "must haves" and "nice to haves"
- Fully understand budget constraints
- Develop timeline parameters

#### Phase Deliverables:

- Sample project layouts
- Project budget estimates

### Engineering Study

- Determine the functional requirement for the project
- Develop and agree on initial concept designs
- Finalize detailed project estimates
- Estimate delivery, installation, and training timeline
- Prepare return on investment model

#### Phase Deliverables:

- Finalize layouts demonstrating overall project concept, cost, timelines and return on investment
- Full document package to be delivered in Adobe® PDF format

### Project Execution

- Provide full project management including supplier coordination
- Final review of design, cost and timelines

#### Phase Deliverables:

- Start-up coordination and support
- Provide training plans and all necessary manuals
- Equipment procurement assistance including recommended spare part list
