

ADJUSTABLE DUAL WICKET BAGGER

The Volmpack Adjustable Dual Wicket Bagger is a revolutionary automatic wicket bagger that efficiently processes the full range of typical fresh produce bag sizes on a single bagger at amazing speeds. Traditionally, wicket baggers were available only with either a small, standard, or extra-large fill opening which was problematic for packers who wanted to run a wider range of both bag and product sizes on the same bagger.

The Adjustable Dual Wicket Bagger solves that challenge. This bagger can efficiently pack 1 lb bags of small product and up to 20 lb bags of jumbo product into premade, wicketed style bags at high speeds (up to 60 bags per minute).

Patent-pending

FEATURES

- Easily adjustable without the need for change parts
- Less bridging of product with V-Feeding belts
- Closure post designed for use with automatic closers, staplers, and tape heads
- Designed exclusively for wicketed style bags which are available in several material types
- Suction cups to securely hold bag while filling

ADDITIONAL OPTIONS

- V-Feeding Belts
- Improves singulation
 - Less bridging
 - Increases design options
