

MoNo Clipper

The MoNo Clipper packaging machine uses a PE label to seal the tubular net. It has an automatic tube changer that enables a continuous supply of net. This variant is more durable and requires less maintenance than the conventional Clipper because it doesn't need a clip magazine or oil. The integrated labeler supports strip, wine glass, and seal-to-seal labels.

FEATURES

- The packaging machine for the tubular net is closed with a seal using a PE label
- Mono material bags that are easy to recycle
- Accepts both extruded and knitted mesh materials
- Integrated labeler works with both wine glass and strip labels and can easily switch for different packages
- Automatic tube exchange to continue operation while tube netting is refilled

ADDITIONAL OPTIONS

- Thermo bar-code printers
- Net ruckers
- Intermittent discharge conveyor
